

My ideas for games to end some problem in the world:

- 1) Endangered Animals - a graph and facts about endangered animals and how you can help.
- 2) Pollution- a chart to show where the most pollution is and to tell the readers ways to reduce pollution.
- 3) A clean instagram for kids- clean ways to see new trends and safe for kids.
- 4) Travel app- facts about the place you want to go and the hotel and days to stay and tickets.
- 5) College- to find a college upon your interests
- 6) Select your interest- a quiz to see your interest and most accurately.
- 7) Buttons to turn of lights- for lazy people
- 8) App for finding good gifts- to have a way to find good gifts for people.
